

# MOBILE CRUSHING PLANTS

**Feeder**  
With low noise, stable and long life, pre-screening the fines and other advantages, and crushing efficiency is higher.

**Impact Crusher**  
It has the advantages of low rotating speed, high capacity, low energy consumption, simple structure and long life

**Belt**  
Using the entrainment composed by pressure belt and carrier tape to upgrade the conveyor and to feed, multi-use of it.

**Jaw Crusher**  
With simple structure, large crushing ratio, low energy consumption, large capacity and light weight and the finished products are cube

**Vibrating Screen**  
It use the excitation of vibration motor as vibration source, with advantages of low consumption, high capacity, simple structure, low height

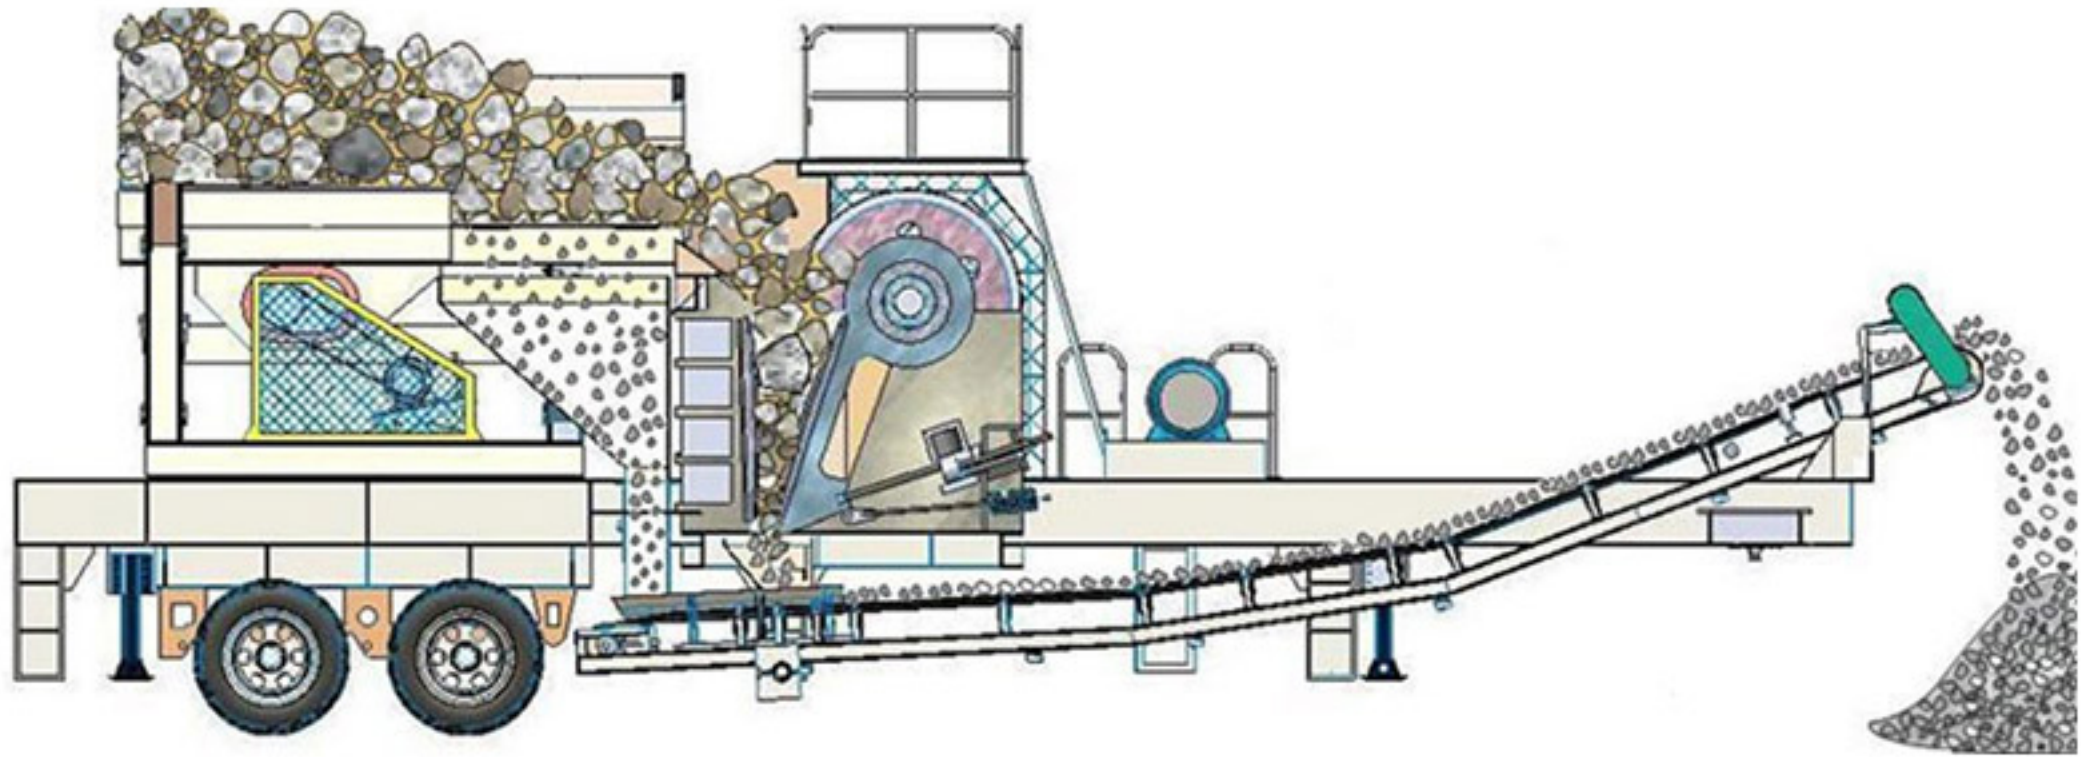

# OVERVIEW

A new designed rock crushing & screening plant is flexible, convenient and story in mobility, so this mobile crusher can save a large construction capital and relocation raw materials can be broken by the Mobile Crushing and the other Crushing equipment of the portable crushing plant at the location without being transported again and can be moved with the promotional exploitation of the raw material which saves a large number of transportation cost.

## Application

The Mobile Crushing plant is not limited by the Crushing place and reduces high material transportation cost. It can crush materials on site. It is widely used in the industry of mining metallurgy, building material traffic, water conservancy and so on.

## FEATURES

- Best engineered & proven jaw crusher
- Hydraulic setting adjustment
- Heavy duty vibrating grizzly feeder with quarry rejects screening
- Heavy duty tri-axle suspension chassis for travel on rough tracks
- Stable & vibration free design
- High capacity & heavily built dump-hopper with folding flaps
- Easy & quick installation by mechanical jacking
- Standard king pin for road haulage
- Rigidly fixed 1000mm wide conveyor with 3.0 discharge height
- Electronic soft starter for jaw & variable speed drive for grizzly
- Complete wired with interlock controls
- Optional rejects conveyor, magnetic separator and dust suppression sprays
